

**Amendments to the Specification:**

Please amend the specification as follows:

At page 2, between lines 14 and 15, insert the following:

In comparison to the female parental cultivar, 95-634-01, 'Anthbneq' has larger spathes, red in color, whereas the spathes of the female parent are pink. 'Anthbneq' has larger, darker leaves than the female parent.

In comparison to the male parental cultivar, 95-523-02, 'Anthbneq' has more durable, smaller spathes, red in color, whereas the spathes of the male parent are orange. In addition, 'Anthbneq' grows more compact than the male parent.

At page 8, between lines 3 and 4 insert:

Berries:        Number of berries after pollination ranges from 1 to 200; the size of the berries grows from 0.1 cm just after pollination to 0.4 cm after approximately 26 weeks; color is green, RHS 137 B (unripe), changing to brownish-yellow, RHS 169 B to 169 C (ripe); flower diameter is approximately 2 mm with up to 200 flowers existing on a fully grown spadix of 5 cm
